

Dazzle offers an excellent combination of effective cleaning and safety for both people and surfaces. The combination of detergents and emulsifiers in Dazzle has proven to be more effective in emulsifying oils in all applications than butyl cellosolve-type cleaners. This cleaning performance comes without potentially hazardous chemicals (such as caustic soda or butyl cellosolve) in its formulation. As a result, Dazzle is less irritating to the hands and skin. It is low-foaming and easily rinsed to reduce residue after drying. Dazzle also has a fresh fragrance and deodorizes as it cleans, making it an excellent choice for bathrooms, garbage cans and other areas where odors can be a problem. U.S.D.A. A4, A8

## Physical Properties

Appearance:	Light Green Liquid
pH (undiluted):	12.5 - 13.5
Weight:	8.75 lb/gal
Specific Gravity:	1.05 g/cc

## Directions

This all-purpose cleaner/degreaser can be used on most hard surfaces not damaged by water. Dazzle can be used at a dilution ratio of 1:28 (1 oz. per gallon) to full strength. Hot water will improve results and reduce cleaning time and effort. To the right are some suggested dilutions for average soil loads. Use less water or soak longer for heavily soiled surfaces. Dazzle should be sprayed, brushed or mopped on the surface to be cleaned. Allow to soak a few minutes and rinse thoroughly.

## Non Warranty

The suggestions and data in this bulletin are based on information we believe to be reliable. They are offered in good faith but without guarantee, as conditions and methods of use of our products are beyond our control. We recommend that the prospective user determine the suitability of our materials and suggestions on an experimental basis before adopting them on a commercial scale.
